Group 1

Here some critic and advise from Group 8

- The navigation a little confusing. After we sign up as new user, what we will do with this web. Illusion content needed in every page.
- After we give comment. 'back' link should take us to previous menu (list of book) not to home page.
- We think that in home page it will be better if you give a little explanation or figure out that show what is the purpose of the web. For example with some latest book added or most commented or most reviewed.
- Two links that appear in the home page still didn't work. It will be better if the link can be separated as new tab or pretty button except for search menu.
- Name of link for comment will be better if change to "comment". Name 'show' more suitable to show all detail about book.
- Don't only count the comment. Review's count also needed by user to make them more interesting to click the book.

group 2

- Your web look nice and systematic.
- In admin for list of country page, the page miss a 'back' link so we can not back to menu page.
- For generator ticket and tracker ticket role they don't have permission to upload evidence, so menu or choice to upload evidence better not appear in the page for both roles.

group 3

- We couldn't access your website during this survey. Evaluation on Group3 is pending and will be attached once the site is alive.

group 4

- Your web is really simple. Every click direct to what's that function should be.
- Functionality of website is really good.
- We though that you provide menu to create new community before. But not anymore, maybe because you already modify it.
- New post should be under community page not as new tab and not every community be one tab.
- Will be better if you can categories the post of place in every community.

group 5

- Your website has good appearance. It's nice and tidy.
- Cannot find my country in selection list when I sign up. You need to add new country text field or enrich you country list.
- After sign up will be better if it sign in automatically to the web.
- There is a bug when I want to edit my content.
- It will be better to give user a warning that it need admin's permission to publish their new content after they created new content.

group 6

- After we sign up or sign in better we get homepage of web.
- More color and picture will make web more attractive for visitor or for user.
- Destroy function not working even though for my own post.
- Log out button should be somewhere but we can not found it.

group 7

- I can edit and destroy the movie detail without login
- There is a bug in search function
- After signing up, I cannot access your web because of bug.
- Your web appearance attractive in top side. But list of movie look mess in the bottom side. You can place them in different tab.
